

Copia Mini

Manual copy router

Clamp 01

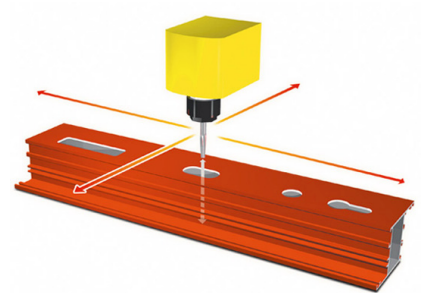

Manual stylus 02

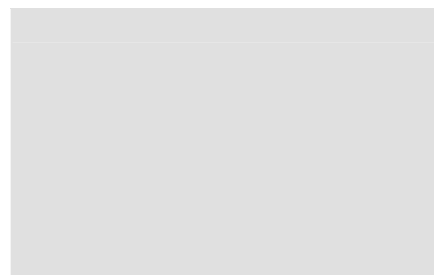

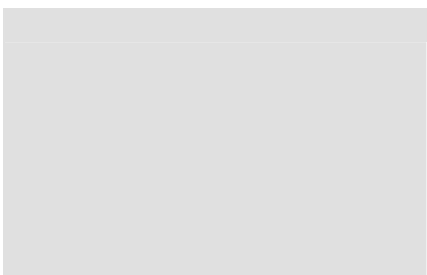

Complementary technologies play an important part in the workshop as the product line consists of various instruments designed to cater for special requirements. The Emmegi range offers a broad spectrum of dedicated machines for all the various milling, drilling, end-milling and filing operations as well as profile positioning and stop gauges.

Copia Mini is a portable vertical copy router which, thanks to its reduced size and compact design of its mechanical parts, is highly suitable for direct use at the worksite.

Manual control 03

Copia Mini

Manual copy router

01 Clamp

The manually operated horizontal clamp ensures correct gripping of the profiles in the machine.

02 Manual stylus

The manually operated stylus allows positioning on relative template with standard figures.

03 Manual control

The lever controls lowering the milling unit.
