

Rotolima

Manual filing machine

Rotary disc file guard 01

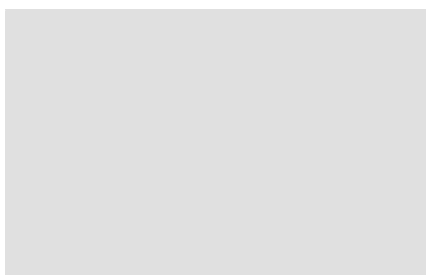

Adjustable protractor 02

Complementary technologies play an important part in the workshop as the product line consists of various instruments designed to cater for special requirements. The Emmegi range offers a broad spectrum of dedicated machines for all the various milling, drilling, end-milling and filing operations as well as profile positioning and stop gauges.

Rotolima is filing machine with disc-shaped rotary file for working aluminium with cutting on 2 faces. It is provided with a graduated protractor, stop and scratch-proof work table.

Adjustable feet 03

Thermal magnetic trip circuit breaker 04

Rotolima

Manual filing machine

01

Rotary disc file guard

The work area is guarded with a transparent polycarbonate enclosure which ensures operator protection.

02

Adjustable protractor

The protractor allows easy reading of the tilting angle for the filing operations.

03

Adjustable feet

Special rubber mounting feet ensure secure resting of the machine on the floor. They are also adjustable in height for better adaptation to the floor resting surface.

04

Thermal magnetic trip circuit breaker

Protection of the motor against overheating and preserving of its intactness is ensured by the thermal magnetic trip circuit breaker.

TECHNICAL CHARACTERISTICS

Motor: 0.75 kW

Tool speed: rpm

Rotary disc file diameter : 250 mm

Net weight: 90 Kg.

Steel rotary disc file
