

FP DEALER "MASTER B2B"

EMMEGISOFT OFFICE CALCULATION
SOFTWARE

FP DEALER:

FP DEALER is a program linked with FP PRO. It is used to process estimates and orders, starting from predefined price lists. It is targeted towards door/window makers who can work out their own sales lists to define the price grid, technical constraints, standard features and possible variants. As well as internally, price lists can be used by sale network through Internet, by the WEB VIEW software. The orders are then converted into production-ready FP PRO jobs, without any need for paper documents and without ever having to re-enter the information.

"MASTER B2B" version:

The version for window/door manufacturers who have their own sales network managed over the internet. It is used to create the company's own price lists, starting from the FP PRO calculation or entered manually, to apply them directly and to distribute them, over the internet, to the sales network, which is equipped with the web software VIEW. It imports, over the internet, the estimates and orders created by VIEW. The orders are converted automatically into FP PRO jobs ready for production.
