

FP GEST "FULL" - TERMINAL SERVER

EMMEGISOFT OFFICE
CALCULATION SOFTWARE

FP GEST:

FP GEST is a management program, linked to FP PRO and FP DEALER, specifically designed for the door/window sector. It plans and coordinates the entire corporate production process, scheduling the required activities to be performed by each resource (men and machinery) in order to ensure that the jobs are executed in the set times and following the criteria for organization and efficiency. It includes integrated, advanced management of purchasing, stock and administration. It uses Gantt diagrams and bar graphs to offer graphic representations of the jobs, the planning, the work progression and the work loads. These representations are easy to consult and interpret.

"FULL" version:

The version for complete window and door company management. It includes: acquired job order management, entire production process planning, with activity progress control, connection to FP WORKSHOP, advanced management of purchasing and stock (multi-supplier, multi-stock, etc.), administrative management (TD and incoming/outgoing invoices, loans, bill books, etc.), final and industrial accounting.

"FULL" - TERMINAL SERVER version:

The version for Terminal Server (in which both software and data are installed only on the server) has the advantage of an easy maintenance, an increased operating speed and a flexible use, also from remote locations via the Internet, under the condition of not exceeding the maximum number of allowed concurrent users.

**FP GEST "FULL" - TERMINAL SERVER / EMMEGISOFT OFFICE CALCULATION SOFTWARE****JOB PLANNING AND MANAGEMENT**
