

FP PRO "EXECUTIVE" - TERMINAL SERVER

EMMEGISOFT OFFICE
CALCULATION SOFTWARE

FP PRO:

FP PRO is the main FP SUITE program since it includes the basic functions used by all door/window makers: door/window design, job definition and calculation, analytical estimate, purchasing management, generation of workshop work lists, heat transmission calculation, CE mark management. It comes in 5 versions and is suitable for companies of any size. It is easy to use and employs a userfriendly graphical interface displaying real profiles, multi-joints, sections, 3D styles. It can operate in a network where files are shared over an SQL database.

"EXECUTIVE" version:

The version for management of the cutting/machining "integrated system". In addition to all the window and door functions, it includes graphic control of the machining operations and linking with Cutting-off machines and Machining Centres. It includes the "EASYMAC" function to associate the machining processes with the fittings, so as to quickly obtain the work lists to be sent to the Centre.

"EXECUTIVE" - TERMINAL SERVER version:

The version for Terminal Server (in which both software and data are installed only on the server) has the advantage of an easy maintenance, an increased operating speed and a flexible use, also from remote locations via the Internet, under the condition of not exceeding the maximum number of allowed concurrent users.
