### Surface in soft nonslip PVC

The working surfaces are covered with soft nonslip PVC that provides secure support when positioning the frame.

## Support surface in hard anti-friction PVC

The anti-friction hard PVC support surface ensures great smoothness of the frame allowing easy handling.

Pneumatic bench exchange

A pneumatic cylinder system operates the pneumatic exchange ensuring that the hard PVC support surface rises with respect to the soft PVC support surface.

#### **Adjustable feet**

Height adjustable feet to ensure the work bench can be positioned at the required height and perfectly flush with the other products in the Dynamic Line. The feet also have holes so they can be anchored to the floor.
